

EXCITING NEWS

Dear Parents and Carers

As you know, we were recently awarded a Nature Education Grant to 'make grey spaces green' and to increase wildlife, such as birds and insects, on our site. The children are very excited by this project and have had lots of great ideas which have shaped our plan for the space.

We are now ready to start work on the creation of a community allotment, to the front of our building, where we can grow fruit and vegetables together. We would really like parents/ carers to come in and work with your child/ren and our team to achieve this.

Our first session to prepare the space and begin planting will be on:

Wednesday 5th March
from 9.30am - 10.30am.

Please come along and join us.
