

Exciting New Project

We have registered to take part in the Eco School Early Years program.

Eco Schools have been going for 31 years so far and it is the nation's largest environmental school program. Last year, 2300 eco schools were awarded green flags and 600 of these were nursery settings. Eco Schools is a global program with around 100 countries around the world taking part. In September 2024, Eco Schools Early Years was launched which is a more bespoke program for early years settings and youngest learners.

We have lots of exciting things planned with the children as we complete the 7 steps which make up the Eco Schools Early Years program. We are hoping to be awarded a green flag at the end of the academic year.

We will keep you updated with the actions we are taking and the activities and experiences children are engaging in through Tapestry and our social media.
